Making data work: how to turn numbers into knowledge

Andy Larsen, The Salt Lake Tribune

Abstract

As the Salt Lake Tribune data columnist, Andy Larsen's job is to turn the numbers in our world into insight for a general audience. So how do you best do that? Andy will describe how he chooses topics to cover, and the process of understanding those topics. Most important: he'll show how to present data in an intuitive way, in both graphics and words.

Place: ECC 311/313 (Eccles Conference Center, for a map click here)
